How to log in to the WVM-Wireless – Guest Access

Periodically, users of the West Valley-Mission Community College District wireless networks will need to register their devices on our network. To do this, please follow the procedures below.

- Connect to the **WVM-Wireless** network from your computing device.
- Open your Browser. If you are using a Mac, you must use **Safari**. If you are using a Windows system, you must use **Internet Explorer**.
- You will be served with a page that shows the *West Valley-Mission Community College District Acceptable Use Policy*.
- Click “**Agree**”. (If you click “Disagree” you won’t be allowed access.)
- Your browser screen should now look like this:

![Screenshot of the login page](image)

- Click on the **Start** link next to the Guests section, as shown above.
- At the next screen, enter the requested information on the screen as shown below:
• Under the Mobile Provider menu, pull down to the provider of your cellular phone service. This is required for guest access to the wireless network.
• Click on the **Request Guest Access** button.
• Your screen will change to look like this:

![Login Screen]

• You will receive an email and text message with your login and password for your session. The session is valid for **24 hours**.
• Enter the user name and password in the User Name and Password fields and click on the **Login** button.
• Your system will then be reconfigured for the production wireless network. During this time your browser will show you a progress bar.

![Progress Bar]

Once complete, you will be asked to restart your browser. In some cases, you may need to restart your computer for changes to take effect.
• You will then be able to use the wireless network.
