How to log in to the WVM-Wireless: Students, Faculty & Staff

Periodically, users of the West Valley-Mission Community College District wireless networks will need to register their devices on our network. To do this, please follow the procedures below.

- Connect to the **WVM-Wireless** network from your wireless settings.
- Open your browser:
  - Windows users MUST use Internet Explorer
  - Mac users MUST use Safari
  - Smart phone/tablet users MUST use their native browser (the one that came with the device).
- You will be served with a page that shows the West Valley-Mission Community College District Acceptable Use Policy.
- Click “**Agree**”. (If you click “Disagree” you won’t be allowed access.)
- Your browser screen should now look like this:

![Network Access Control](image)

- Click on the **Start** link next to the Students, Faculty, & Staff section, as shown above.
- At the next screen, **enter your College ID and Password**. These are the same ones you use to access the My Mission (MC) Portal.
- Your system will then be reconfigured for the wireless network.
- During this time your browser will show you a progress bar.
- Once complete, you will be asked to restart your browser. In some cases, you may need to restart your computer for changes to take effect.
- You will then be able to use the wireless network.
